

LCRA will lower lakes LBJ and Marble Falls for about eight weeks beginning Sunday, Dec. 30.

Lake LBJ will be lowered about 4 feet and Lake Marble Falls will be lowered about 7 feet. The lakes will be lowered about one foot a day beginning Dec. 30, meaning Lake LBJ will be fully lowered by the end of the day on Jan. 2 and Lake Marble Falls will reach its lowered level by the end of the day on Jan. 5.

The refill will begin on Feb. 19 and will conclude on Feb. 23.

Residents and property owners who want to perform dredging, remove debris or work on existing retaining walls during the drawdown must [register their projects with LCRA](#) before beginning work.

Please keep in mind that unforeseen circumstances such as floods or power emergencies could prompt LCRA to change or cancel the scheduled drawdown. Equipment and tools should not be left in the lake unattended and should be removed from the lakebed when not in use.

Visit [lcra.org/lakelowerings](http://lcra.org/lakelowerings) for more information, including the Nov. 5 news release about the drawdown, lakewide permits, permit notices and FAQs.

**I will be out office until January 2, 2019. If you have any questions, please call LCRA Water Quality Protection at 512-578-2324.**

Thank you & happy holidays!

Valerie Miller, PhD  
Manager, Water Contracts & Conservation
